Sir:

In response to the Office Action mailed 2003 November 7, please amend the above application as follows:

Claims:

161. (previously presented): In a firearm having a sear, a trigger, a triggerbar capable of rotation relative to said trigger, and a longitudinally slidable firing element; a passive safety mechanism comprising:

- a. a blocking piece to block said firing element; and
- b. a linkage, distinct from said triggerbar, which connects said trigger and said blocking piece;

characterized in that removal of said linkage will disconnect said triggerbar from said trigger.

162. (previously presented): The passive safety mechanism of claim 161 wherein said linkage is slidable.
